

JIANGSU HUAILONG OFFICIALLY COMMISSIONS ITS SECOND GGBS PRODUCTION LINE

03 August 2009

Jiangsu Huailong Materials Company Limited has officially commissioned its second production line of GGBS (Ground Granulated Blast-furnace Slag) on August 3, 2009, using the same state-of-the-art UBE vertical grinding technology as its first production line, producing 0.6-million tons of GGBS per annum.

With Huailong's first line (commissioned in 2006) and the successful commissioning of this second production line, Huailong's annual GGBS production capacity has risen to 1.2 million tons. This second production line is the continuation of friendly cooperation between EnGro Corporation Limited and Jiangsu Huaigang Group Co. Ltd. (HuaiGang) since 2005.

At present, EnGro has five joint venture companies spread across three provinces in China (Jiangsu, Shandong and Hebei). With a total of eight GGBS production lines, EnGro's annual total combined GGBS production capacity now stands at 4.8 million tons, making it one of the largest GGBS production Group in China.
