

JIANGSU HUAILONG MATERIALS SELECTED AS 2009 CHINA TOP 500 BUILDING MATERIAL

20 October 2009

Jiangsu Huailong Materials Co. Ltd (Huailong) was selected as '2009 China Top 500 Building Materials Company' by China Building Materials Enterprise Management Association in October 2009.

Ground Granulated Blast-furnace Slag (GGBS) manufactured by Huailong is a type of green and environment-friendly building materials. It has received good response in the market since its launch in July 2006. At present, Huailong's GGBS annual designed production capacity has reached 1.2 million tons per annum.

With its high quality product, stable supply and good service, Huailong fulfils the requisite characteristics to be the leader and main supplier in the local GGBS industry. Its high quality product – GGBS – has been widely used in various types of construction projects. Interestingly, Huailong's GGBS is also used in mega-size infrastructure projects such as the prestigious 1,318km long Beijing-Shanghai High Speed Railway project and the Hefei-Banbu railway construction in Anhui province.
